

Revision of number and place value

Multiply and divide by 10, 100 and 1000

Set 1

- 1) 32×10
- 2) 45×10
- 3) 97×10
- 4) 193×10
- 5) 268×10
- 6) $230 \div 10$
- 7) $640 \div 10$
- 8) $790 \div 10$
- 9) $310 \div 10$
- 10) $990 \div 10$

Set 2

- 1) 478×10
- 2) 367×10
- 3) 920×10
- 4) 34×100
- 5) 68×100
- 6) $450 \div 10$
- 7) $710 \div 10$
- 8) $2200 \div 100$
- 9) $5600 \div 100$
- 10) $9900 \div 1000$

Set 3

- 1) 2346×10
- 2) 9028×10
- 3) 6587×10
- 4) 9809×10
- 5) 764×10
- 6) $910 \div 10$
- 7) $340 \div 100$
- 8) $6700 \div 100$
- 9) $950 \div 1000$
- 10) $100100 \div 1000$

Reading and writing numbers

Write these words as numbers:

- 1) Three hundred and twelve
- 2) Nine hundred and sixty-two
- 3) Seven hundred and six
- 4) Four hundred and twenty-five
- 5) Eight hundred and nine
- 6) Six thousand and two
- 7) One thousand three hundred and seventy-nine
- 8) Twelve thousand six hundred and thirty-four
- 9) One hundred and seventeen thousand and forty-six
- 10) Three hundred and forty-eight thousand nine hundred
- 11) Sixteen point three-five
- 12) Four hundred and seventeen point nine
- 13) Two million three hundred and twenty-five thousand seven hundred and eighty-six
- 14) Five point eight
- 15) Fifteen point zero three

Reading and writing numbers

Write these numbers in words:

- 1) 432
- 2) 345
- 3) 760
- 4) 103
- 5) 987
- 6) 4312
- 7) 5496
- 8) 6471
- 9) 4007
- 10) 35.54
- 11) 17.63
- 12) 2,908,712
- 13) 300,542
- 14) 280,091
- 15) 9,000,231

The numbers on the judges scoreboard have fallen off. The digits are 5 9 and 6. using these numbers there are six different possible scores:

569 596 659 695 956 965

The highest possible score is 965, the lowest possible score is 569. the difference between the two scores is $965 - 569 = 396$ (use column method to work out the answers)

Using these digits find all the possibilities and then find the difference between the highest and lowest numbers.

9 3 2

Now try it with these digits – can you find more possibilities?

Using these digits find all the possibilities and then find the difference between the highest and lowest numbers.

6 7 8 9

Use all these digits (every time) to make the following numbers:

4 5 0 9 2

- 1) The highest multiple of ten
- 2) The lowest even number you can make
- 3) An even number less than 40,000
- 4) An odd number more than 50,000
- 5) The lowest multiple of 5 you can make
- 6) The highest number
- 7) The lowest number
- 8) Find the difference between the highest and lowest number

Negative numbers

Use a number line to help you work it out

Using a numberline to calculate with negative numbers.

$$3 - 5 = -2$$

Taking away 5 means making 5 jumps

When working out subtraction start at the right of the number line

When working out addition start at the left of the number line

$$-4 + 6 = 2$$

adding 6 means making 6 jumps

You must include the '0'

Negative numbers

$$1) 9 - 12$$

$$2) -3 + 12$$

$$3) 7 - 13$$

$$4) 9 - 15$$

$$5) -5 + 12$$

$$6) -3 + 11$$

$$7) -9 - 1$$

$$8) 10 - 13$$

$$9) -8 + 14$$

$$10) -4 + 7$$

Identifying numbers on a number line

Record the numbers identified by the boxes
