

# Answers for Wednesday's lesson

**A**

Dexter says there is only one way to partition 0.62

$$0.62 = 0.12 + 0.5$$

$$0.62 = 0.4 + 0.22$$

$$0.62 = 0.3 + 0.32$$

$$0.62 = 0.42 + 0.2$$

$$0.62 = 0.1 + 0.52$$

$$0.62 = 0.03 + 0.59$$

etc.

Teddy - 40.46

Amir - 46.2

Rosie - 46.02

Eva - 2.64

There are **0 ones**, **1 tenth** and **2 hundredths**. The number is **0.12**

**B**

## Odd one out

Which of the images below is the odd one out?

Possible answer:

B is the odd one out because it shows  $\frac{2}{5}$ , which is  $\frac{4}{10}$  or 0.4

The other images show  $\frac{2}{10}$  or 0.2

Use the models to record equivalent decimals and fractions.

$$0.3 = \frac{3}{10} = \frac{30}{100}$$

$$0.33 = \frac{33}{100} \quad 0.03 = \frac{3}{100} \quad 3.03 = 3 \text{ and } \frac{3}{100}$$

a -1.13

b -1.31

c - 1.35

d - 1.53

C

Amir says,

To convert a fraction to a decimal, take the numerator and put it after the decimal point.

E.g.  $\frac{21}{100} = 0.21$

Possible answers could include  $\frac{1}{100}$  is not equal to 0.1

1.431

2.322

0.394

= 3 tenths, 9 hundredths and 4 thousandths

$$= \frac{3}{10} + \frac{9}{100} + \frac{4}{1000}$$

$$= 0.3 + 0.09 + 0.004$$

Write these numbers in three different ways:

0.472

0.529

0.307

0.472 = 4 tenths, seven hundredths and 2 thousandths  
 $= \frac{4}{10} + \frac{7}{100} + \frac{2}{1000}$   
 $= 0.4 + 0.07 + 0.002$

0.529 = 5 tenths, two hundredths and 9 thousandths  
 $= \frac{5}{10} + \frac{2}{100} + \frac{9}{1000}$   
 $= 0.5 + 0.02 + 0.009$

0.307 = 3 tenths and 7 thousandths  
 $= \frac{3}{10} + \frac{7}{1000}$   
 $= 0.3 + 0.007$

D

Dexter is measuring a box of chocolates with a ruler that measures in centimetres and millimetres.

Smallest: 27.5 cm

1

7

4

1.2

7

4.5

Whitney is thinking of a number.

Possible answers: 3.84, 3.83, 3.82 etc.

Rounded to the nearest whole her number is 4

Rounded to the nearest tenth her number is 3.8

Write down at least 4 different numbers that she could be thinking of.

Some children might include answers such as 3.845

E

Use  $<$ ,  $>$  or  $=$  to make the statements correct.

Alex says,

3.105 is greater than 3.2 because 105 is greater than 2

Alex is wrong because 2 tenths is larger than 105 thousandths.

Place the numbers in ascending order on the number line.

3.115

$3 \frac{113}{1000}$

Three and 11 hundredths

Three and 11 hundredths.....  $3 \frac{113}{1000}$  ..... 3.115

F

Complete the table.

Pictorial	Percentage	Fraction	Decimal
	41 parts per hundred 41%	41 out of 100 $\frac{41}{100}$	41 hundredths 0.41
	43 parts per hundred 43%	43 out of 100 $\frac{43}{100}$	43 hundredths 0.43
	7 parts per hundred 7%	7 out of 100 $\frac{7}{100}$	7 hundredths 0.07

Mo, Annie and Tommy all did a test with 100 questions. Tommy got 6 fewer questions correct than Mo.

Name	Score	Percentage
Mo	56 out of 100	
Annie		65%
Tommy		

56%  
65 out of 100  
50 out of 100  
50%

Complete the table.  
How many more marks did each child need to score 100%?

Mo needs 44  
Annie needs 35  
Tommy needs 50

**F**

Dora and Amir each have 100 sweets.  
Dora eats 65% of hers. Amir has 35  
sweets left.  
Who has more sweets left?

Neither. They both  
have an equal  
number of sweets  
remaining.

Alex has read 93 pages of her book. Her book has 300 pages.  
What proportion of her book has she read? Give your answer as a  
percentage and a decimal.

$$\frac{93}{300} = \frac{?}{100} = \text{_____} \% = \text{_____}$$

$$93/300 = 31/100 = 31\% = 0.31$$

Record the fractions as decimals and percentages.

$$\frac{120}{300} \quad \frac{320}{400} \quad \frac{20}{200} \quad \frac{12}{50}$$

$$120/300 = 40/100 = 4/10 = 0.4$$

$$320/400 = 80/100 = 8/10 = 0.8$$

$$20/200 = 2/100 = 1/50 = 0.02$$

$$12/50 = 24/100 = 0.24$$

Because it is nearly summer I have found some summer based activities that will be helpful for some 'random' revision – keeping on top of your knowledge is always good!

The summer based work might also entice the sun back ready for the summer holidays!

# TASK 1:

									
<b>2</b>	<b>4</b>	<b>8</b>	<b>6</b>	<b>1</b>	<b>0</b>	<b>5</b>	<b>9</b>	<b>3</b>	<b>7</b>

In the number						what is the value of the  ?
---------------	--	---	---	---	---	--

Answer: \_\_\_\_\_

In the number						what is the value of the  ?
---------------	---	---	---	---	---	--

Answer: \_\_\_\_\_

In the number						what is the value of the  ?
---------------	---	---	---	---	---	--

Answer: \_\_\_\_\_

What is the number						rounded to the nearest 10?
--------------------	---	---	---	---	---	----------------------------

Answer: \_\_\_\_\_

What is the number						rounded to the nearest 100?
--------------------	---	---	---	---	---	-----------------------------

Answer: \_\_\_\_\_

What is the number				written in Roman numerals?
--------------------	---	---	---	----------------------------

Answer: \_\_\_\_\_

# TASK 2:

Solve the calculations and use the code breaker to spell out a summer-themed joke. The joke will read down the tables.

A	B	C	D	E	F	G	H	I	J	K	L	M
6	15	21	5	13	24	18	7	12	1	25	19	9

N	O	P	Q	R	S	T	U	V	W	X	Y	Z
22	16	11	26	2	17	20	3	10	8	14	23	4

	Answer	Letter
$64 \div 8$		
$63 \div 9$		
$1300 \div 100$		
$0.02 \times 100$		
$1.3 \times 10$		

	Answer	Letter
$55 \div 11$		
$160 \div 10$		

	Answer	Letter
$0.24 \times 100$		
$144 \div 12$		
$1700 \div 100$		
$56 \div 8$		

	Answer	Letter
$1.8 \times 10$		
$1600 \div 100$		

	Answer	Letter
$4 \times 4$		
$2.2 \times 10$		

	Answer	Letter
$42 \div 6$		
$8 \times 2$		
$190 \div 10$		
$96 \div 8$		
$0.5 \times 10$		
$48 \div 8$		
$0.23 \times 100$		?

	Answer	Letter
$3 \times 8$		
$60 \div 5$		
$0.22 \times 100$		
$1900 \div 100$		
$54 \div 9$		
$11 \times 2$		
$0.05 \times 100$		

Question: \_\_\_\_\_  
 \_\_\_\_\_  
 \_\_\_\_\_

Punchline: \_\_\_\_\_

# TASK 3:

## Across:

1. x
3. x
5. x
7. x
8. x
9. x
11. x

## Down:

1. x
2. x
3. x
4. x
6. x
7. x
10. x

<b>2</b>	<b>4</b>	<b>8</b>	<b>6</b>	<b>1</b>	<b>0</b>	<b>5</b>	<b>9</b>	<b>3</b>	<b>7</b>

# TASK 4:

I collect some shells on the beach.

I multiply the number of shells by 5.

I then subtract 15,

multiply by 7,

and divide by 2.

I end with the number 735.

How many shells did I collect?

I decorate my sandcastle with flags.

I multiply the number of flags by 7.

I then add 78,

multiply by 4,

and divide by 3.

I end with the number 300.

How many flags did I use to decorate my sandcastle?

I practise cartwheels on the sand.

I multiply the number of cartwheels by 8.

I then subtract 132,

multiply by 10,

and divide by 4.

I end with the number 30.

How many cartwheels did I do?

# TASK 5:

Jasper went on his summer holiday to Greece. Sonia went on her summer holiday to Cornwall. Here is a line graph showing the highest daily temperature on each day of their summer holidays.

Use the graph to answer the questions.

A Line Graph to Show the Highest Daily Temperatures in Greece and Cornwall

1. What was the temperature on day 4 of Jasper's holiday? <input type="text"/>	2. What was the temperature on day 1 on Sonia's holiday? <input type="text"/>
3. What was the difference in temperature between Greece and Cornwall on day 3? <input type="text"/>	4. How much warmer was it in Greece than Cornwall on day 7? <input type="text"/>
5. On which day was the temperature of Sonia's holiday 21°C? <input type="text"/>	6. On which day did the temperature in Greece decrease? <input type="text"/>
